VITAMIN D3 + K2 GUMMIES

The combination of vitamin D3 and vitamin K2 provides enhanced support for the health and maintenance of normal bones.* Vitamin D3 (as cholecalciferol) is the more easily utilized and effective form of vitamin D. Vitamin K2 (as menaquinone-7) is a bioactive and bioavailable form of vitamin K.

Together, these vitamins work in tandem to support osteoblasts (bone-forming cells) and facilitate mineral balance in the blood.* Each great-tasting, chewable gummy provides 1000 IU (25 mcg) of vitamin D3 plus 45 mcg of vitamin K2.

Suggested Use: Adults take one gummy daily, with food, or as directed by your healthcare professional.

Store in a cool, dry place, away from sunlight. Do not take if tamper-evident seal is broken or missing. Keep out of the reach of children

Warning: Consult with your physician before taking this product if have a known medical condition (including bleeding disorders, kidney disorders or hypercalcemia), or are taking medications (including blood thinners).

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

This product and its ingredients do not contain common GE genes or proteins. Visit igenprogram.com
