

Product Name: BIC Utility Lighter

**SAFETY DATA SHEET**

Date Prepared:  
August 16, 2022

Version 13

**SECTION 1 – IDENTIFICATION**

Product Name:	BIC Utility Lighter
Synonyms:	None
Product Use:	Device intended to produce a flame.
Manufacturer/ Vendor Information:	Supplier information: BIC Corporation One BIC Way, Suite 1 Shelton, CT 06484 USA (203) 783-2000 Emergency Telephone Number: (203) 783-2412 For Transportation Emergencies call CHEMTREC: (800)424-9300  BIC Inc. 155 Oakdale Road Downsview, Ontario M3N 1W2 CANADA (416) 742-9173 x288 (Business hours)
SDS Contact:	Product Safety
Telephone number:	(203) 783-2412

**SECTION 2 – HAZARD(S) IDENTIFICATION**

<b>This product is a consumer product and is not subject to the requirements of OSHA 29 CFR 1910.1200. Nonetheless, this SDS, including the hazard identification in accordance with 29 CFR 1910.1200, is provided for the information of product users.</b>	
Classification of the fuel in Accordance with 29 CFR § 1910.1200:	Flammable Gas – Category 1 Gas Under Pressure – Liquefied Gas
Signal Word (fuel):	Danger
Hazard Statements (fuel):	Extremely flammable gas Contains gas under pressure; may explode if heated Packaged product exhibits a lesser hazard due to fuel containment within the product and protection of the packaging.
Symbols (fuel):	 

Precautionary Statements (product):	<p><u>Prevention:</u> Keep away from heat/sparks/open flames/hot surfaces.</p> <p><u>Response:</u> Eliminate all ignition sources if safe to do so. In case of fire: Extinguish with water.</p> <p><u>Storage:</u> Protect from sunlight.</p>
Any Hazards Not Otherwise Classified (fuel):	Contact with liquefied gas may cause cold burns or frostbite to skin or eyes. Repeated inhalation of high concentrations of liquefied petroleum gas may cause weak cardiac sensitization to catecholamine drugs such as epinephrine.
<b>For more information refer to Section 11 of this SDS</b>	

### SECTION 3 – COMPOSITION/INFORMATION ON INGREDIENTS

<b>Substance:</b>		
CAS No.	Chemical Name	Percentage
68476-86-8	Liquefied petroleum gases	100%

### SECTION 4 – FIRST-AID MEASURES

Eyes:	In the event of contact with liquefied petroleum gas, immediately flush with lukewarm gently flowing water for at least 15 minutes. If frostbite has occurred, DO NOT attempt to rewarm. Cover both eyes with a sterile dressing. DO NOT allow victim to drink alcohol or smoke. Quickly transport victim to an emergency care facility.
Skin:	In the event of contact with liquefied petroleum gas causing frostbite to the skin: DO NOT attempt to rewarm the affected area on site. DO NOT rub area or apply dry heat. Gently remove clothing or jewelry that may restrict circulation. Carefully cut around any clothing that sticks to the skin, and remove the rest of the garment. Loosely cover the affected area with a sterile dressing. DO NOT allow victim to drink alcohol or smoke. Quickly transport victim to emergency care facility. As quickly as possible, remove contaminated clothing, shoes, and leather goods (e.g., watchbands, belts) as the product is extremely flammable.
Inhalation:	The fuel inside the lighter product is extremely flammable. Take proper precautions (e.g., remove any sources of ignition). If breathing has stopped, trained personnel should begin artificial respiration (AR) or, if the heart has stopped, cardiopulmonary resuscitation (CPR) immediately. Immediately transport victim to an emergency care facility.
Ingestion:	Ingestion of this product is unlikely. Ingestion of the liquefied petroleum gas is also unlikely.
<b>Most Important Symptoms and Effects, Both Acute and Delayed</b>	
Symptoms/Injuries after Inhalation:	Inhalation of high concentrations of the gas can cause CNS effects due to simple asphyxiant properties and weak cardiac sensitization to catecholamine drugs such as epinephrine.
Symptoms/Injuries after Skin Contact:	Direct contact with liquefied petroleum gas may cause cold burns/frostbite.
Symptoms/Injuries after Eye Contact:	Direct contact with liquefied petroleum gas may cause cold burns/frostbite and permanent eye damage.
Symptoms/Injuries after Ingestion:	Ingestion of this product is unlikely. Ingestion of liquefied petroleum gas is also unlikely.

Indication of Any Immediate Medical Attention and Special Treatment Needed
Treat symptomatically.

### SECTION 5 – FIRE-FIGHTING MEASURES

Extinguishing Media:	Suitable: Water, foam, dry chemical powder, carbon dioxide.
Conditions of Flammability:	Fire characteristics of the packaged product are heavily influenced by the packaging materials. The fuel within the lighter product is <b>EXTREMELY FLAMMABLE</b> . In the event of damage to the product, small quantities of extremely flammable liquefied petroleum gas can be released. Provide adequate ventilation and keep ignition sources far removed.
Hazardous Combustion Products:	Carbon monoxide, carbon dioxide, smoke and irritating gases may be formed on combustion.
Special Firefighting Procedures:	Wear self-contained breathing apparatus and protective clothing to prevent inhalation and contact with skin and eyes.

### SECTION 6 – ACCIDENTAL RELEASE MEASURES

Personal Precautions:	In the event of damage to the product, small quantities of extremely flammable liquefied petroleum gas can be released. Provide adequate ventilation and keep ignition sources far removed.
Methods for Containment and Cleaning Up:	Clean up spilled material and repackage for proper waste management.

### SECTION 7 – HANDLING AND STORAGE

<b>Handling</b>	
Precautions for Safety Handling:	Take care to prevent damage to product.
<b>Storage</b>	Store away from heat and sources of ignition.

### SECTION 8 – EXPOSURE CONTROLS/PERSONAL PROTECTION

Control Parameters: Packaged product exhibits a lesser hazard due to fuel containment within the product and protection of the packaging.

Chemical Name	CAS Number	Exposure Limits
Liquefied petroleum gases	68476-86-8	NIOSH: (REL-TWA 10h) 1000 ppm (based on a similar material)
Personal protective equipment is not necessary under normal conditions of use.		
Engineering Measures:	For normal application, special ventilation is not necessary.	
Eye Protection:	Not required under normal use conditions.	
Hand Protection:	None necessary under normal use conditions.	
Skin and Body Protection:	None necessary under normal use conditions.	
Respiratory Protection:	None necessary under normal use conditions.	

NIOSH = National Institute for Occupational Safety and Health  
REL = Recommended Exposure Limit  
TWA= Time-Weighted Average

### SECTION 9 – PHYSICAL AND CHEMICAL PROPERTIES

Appearance & Physical State:	The product is an article – a device consisting of plastic and metal components containing a clear colorless liquefied gas.
Odor (fuel):	Sweet petroleum odor (liquefied petroleum gas) and slight plastic odor (casing)
Odor Threshold (fuel):	Not available
pH (fuel):	Not applicable
Melting Point (fuel):	-138.3°C (-216.9°F) – Liquefied petroleum gas
Boiling Point (fuel):	-23.3°C (-10 °F) – Liquefied petroleum gas
Flash Point (fuel):	-104.5°C (-156°F) (Estimated)
Evaporation Rate (fuel):	>>1 (immediately evaporates) (Ethyl ether=1) – Liquefied petroleum gas
Flammability (fuel):	Fuel is extremely flammable gas.
Flammable Limits in Air (fuel)	
Lower (LFL):	1.8% by volume – Liquefied petroleum gas
Upper (UFL):	9.5 % by volume – Liquefied petroleum gas
Vapor Pressure (fuel):	50 PSIG @ 70°F (21°C) – Liquefied petroleum gas
Vapor Density (fuel):	1.89 @ 60°F (15.6°C) (air =1) – Liquefied petroleum gas
Density/Specific Gravity (fuel):	0.552 – Liquefied petroleum gas
Solubility in Water (fuel):	Very slightly soluble (0.008%) (liquefied petroleum gas). Insoluble (casing).
Octanol/ Water Partition Coefficient (fuel):	Log P <sub>(OCT)</sub> <= 2.8 (Estimated)
Auto-ignition Temperature (fuel):	770-1,004°F (410-540°C) Closed Cup – Liquefied petroleum gas
Decomposition Temperature (fuel):	Not available
Viscosity:	Not applicable

### SECTION 10 – STABILITY AND REACTIVITY

Reactivity:	This product is stable under the normal conditions of use.
Chemical Stability:	Stable
Possibility of Hazardous Reactions:	Will not undergo hazardous polymerization.
Conditions to Avoid:	Avoid heat sources, sparks or flames.
Incompatible Materials:	Avoid strong oxidizing agents.
Hazardous Decomposition Products:	None expected under the normal conditions of use.

### SECTION 11 – TOXICOLOGICAL INFORMATION

<b>Routes of Entry:</b>	Gas poses opportunity for Skin contact, Inhalation, Eye contact.		
<b>Acute Toxicity</b>			
<i>Product data:</i>	Not available.		
<i>Ingredient data:</i>			
<u>Chemical</u>	<u>CAS#</u>	<u>Route &amp; Species</u>	<u>Value</u>
Liquefied petroleum gas (LPG)	68476-86-8	No data available for LPG.	No data available for LPG.

Eye Irritation:	Not expected to be an eye irritant. Contact with liquefied petroleum gas may cause cold burns/frostbite and permanent eye damage.
Skin Irritation:	Not expected to be a primary skin irritant. Contact with liquefied petroleum gas may cause cold burns/frostbite.
Ingestion Effects:	Not applicable. Not an expected route of entry.
Inhalation Effects:	Inhalation of high concentrations can cause CNS effects due to simple asphyxiant properties and weak cardiac sensitization to catecholamine drugs such as epinephrine.
Skin Sensitization:	Contact with this product is not expected to cause skin sensitization, based upon the available data and the known hazards of the components.
Respiratory Tract Sensitization:	Contact with this product is not expected to cause respiratory tract sensitization, based upon the available data and the known hazards of the components.
<b>Chronic Toxicity</b>	
Carcinogenicity:	This product is not known to contain any components at $\geq 0.1\%$ that have been shown to cause cancer. Therefore, based upon the available data and the known hazards of the components, this product is not expected to be a carcinogen.
Mutagenicity:	This product is not known to contain any components at $\geq 0.1\%$ that have been shown to cause mutagenicity. Therefore, based upon the available data and the known hazards of the components, this product is not expected to be a mutagen.
Reproductive Toxicity:	This product is not known to contain any components at $\geq 0.1\%$ that have been shown to cause reproductive toxicity. Therefore, based upon the available data and the known hazards of the components, this product is not expected to be a reproductive toxin.
Teratogenicity/Embryotoxicity:	This product is not known to contain any components at $\geq 0.1\%$ that have been shown to cause teratogenicity and/or embryotoxicity. Therefore, based upon the available data and the known hazards of the components, this product is not expected to be a teratogen/embryotoxin.
Other Chronic Effects:	Exposure to liquefied petroleum gas is not known to cause chronic toxic effects of sufficient severity to threaten life or cause serious impairment.

### SECTION 12 – ECOLOGICAL INFORMATION

Ecotoxicity:	Not Available
Persistence/ Degradability:	Not Available
Bioaccumulation:	Not Available
Mobility:	Not Available
Other Adverse Effects:	Not Available

### SECTION 13 – DISPOSAL CONSIDERATIONS

Waste Disposal Method:	In accordance with local, provincial/territorial or federal guidelines and regulations
------------------------	--

### SECTION 14 – TRANSPORT INFORMATION

	Shipping name	UN Number	Hazard Class	PG
DOT (US)	LIGHTERS	1057	2.1	--

DOT- Department of Transport

**SECTION 15 – REGULATORY INFORMATION**

**OSHA Classification: (OSHA Hazard Communication Standard (29 CFR §1910.1200))**

The liquefied petroleum gas has been classified in accordance with the hazard criteria of the OSHA's HCS/HazCom 2012 and the SDS contains all the information required by the 29 CFR § 1910.1200. The packaged product exhibits a lesser hazard due to the predominance of packaging.

	<b>Hazard Ratings for the liquefied petroleum gas fuel</b>	
	<b>NPCA/HMIS</b>	<b>NFPA 704</b>
Health:	1	1
Flammability:	4	4
Reactivity:	0	0

NPCA/HMIS – National Paint and Coatings Association/ Hazardous Materials Identification System  
NFPA – National Fire Protection Association

1. The components in this product are listed on the TSCA Inventory or are otherwise exempt from TSCA.
2. Some plastics in this product may form formaldehyde gases during their combustion. Formaldehyde is considered to be a carcinogen by the State of California (California Proposition 65) if exposure to it exceeds the No Significant Risk Level (NSRL)- Safe Harbor Level (40 micrograms/day).
3. ASTM F2201-02 (Standard Consumer Safety Specification for Utility Lighters).
4. ISO 22702 (Utility Lighters – Safety Specification).
5. U.S. Safety Standard for Utility Lighters, 16 CFR Part 1212 (December 22, 1999).

**SECTION 16 – OTHER INFORMATION, INCLUDING DATE OF PREPARATION OR LAST REVISION**

Preparation Date: August 16, 2022  
Supersedes Date: April 8, 2020

Disclaimer: The information given is based on data currently available to us and is believed to be correct. No warranty is expressed or implied regarding the accuracy of this data or the results obtained from the use thereof. No responsibility is assumed for injury or damage from the use of the products described herein.
